THRILLING TALE OF THE SEA.

A British Ship Has an Experience Off the Horn Not to Be Erased.

SAN FRANCISCO, Sept. 6.—The British ship Mackinham, Captain Sanders, has arrived, 144 days from Swansea, with a cargo of 2,547 tons of coal. Nearly every vessel which has reached here in the past week has had a thrilling story of battles with the elements, but the experiences of the Mackinham were the worst.

In June she was hove to for five days off the Horn, during which time heavy seas swept from stem to stern, smashing her boats and sweeping everything movable into the sea.

A tidal wave buried the vessel at one time, filling her decks, and at another time a blizzard froze her rigging and running gear so that the ship was unmanageable. Ice clustered about the vessel in some places to the thickness of two feet, and had to be broken with hammers in order to get at the ropes.
